

PORNOGRAPHY
October 21, 2016
CASE OIG-I-2016-528

In July 2015, we initiated an investigation into allegations that an Amtrak Foreman was searching the Internet for pornography, sexually explicit photographs of underage females, and viewing content that appeared to be related to nude or partially nude adolescents. We confirmed that the employee used his Amtrak computer to view sexually explicit images on multiple dates during scheduled work hours; however, we did not find any evidence of child exploitation or child pornography. The employee retired on August 1, 2016.
