

Summary: Investigation of Failure to Submit 8 months of Oil and Gas Reports to ONRR

Report Date: February 12, 2016

OIG investigated information from the Bureau of Land Management (BLM) Special Investigations Group that a lease operator for a BLM lease in New Mexico did not submit Oil and Gas Operations Reports to the Office of Natural Resources Revenue (ONRR) from December 2014 through July 2015 for an individual well.

A preliminary investigation substantiated that the lease operator did not properly report oil and gas production for this well to ONRR from December 2014 through July 2015; however, they did pay the required royalties.

This is a summary of an investigative report that was issued to ONRR for any action deemed appropriate.
